

Ghost Plant

Graptopetalum paraguayense

- I'm a hardy succulent with thick, pointed leaves that vary in color from a light, pastel purple to pale blue.
- My pot needs to have a well-draining soil and drainage holes, and I'll also do great with a mixture of soil, sand, and rock.
- I love a good soak when watered, but these soaks should be infrequent (10-14 days) and only when my soil is dry.
